DETAILED ACTION

Response to Amendment

1. Claims 20, 21 and 22 have been cancelled and claims 1 and 17 have been amended as requested in the amendment of Paper No. 19, filed on February 21, 2003. Claims 1, 3-10, 17, 19 and 23-25 are pending in the instant application.

Claims 1, 3-10, 17, 19 and 23-25 are under examination in the instant office action.

2. The Text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Any objection or rejection of record, which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

4. Applicant's arguments filed on February 21, 2003 have been fully considered but they are not deemed to be persuasive for the reasons set forth below.

Claim Rejections - 35 USC § 112

5. Claims 1, 3-10, 17, 19 and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 17, as amended, are directed to a method for the detection of multiple sclerosis by comparing the degree of binding of iron binding protein with two brain tissue samples, a first brain tissue sample from a human suspected of having a demyelinating disease and a second normal brain tissue sample, wherein a difference in said binding confirms a detection of multiple sclerosis in first tissue sample. Claims 1 and 17 are vague and indefinite

because it is not clear what difference or degree of difference is indicative of multiple sclerosis. Applicant submits that “[I]t is important to stress that any difference in binding of iron binding protein (between the first and the second samples) is diagnostic” (page 5, last paragraph of the Response). However, one skilled in the art would reasonably assume that any two brain tissue samples even from two normal unaffected individuals would display some differences in binding of iron binding protein, or, in another words, would not be completely identical in the pattern of binding distribution. Applicant further “submit[s] that (in view of the teaching provided by the Specification) it is *not necessary* to categorically recite, in the claims, whether said binding is either increased or decreased” (page 6, last paragraph). The Examiner maintains the position that the last step of the claimed method is indefinite because terms “degree” and “difference” are relative terms and until a point of reference is clearly identified, a skilled artisan would not know what level of “degree of binding” or “difference in said binding” is indicative of multiple sclerosis.

Claims 3-10 and 19 and 23-25 are indefinite for being dependent form indefinite claims.

Conclusion

6. No claim is allowed.
7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
